## ABOUT THE COURSE

This workshop “Foundation of Agile Project Management” will introduce participants to Agile software development environment and the paradigm shift needed to introduce a business to Agile approach.

It highlights the unique tools, techniques, knowledge, and skills that an Agile project manager will utilise throughout the software development life cycle.

This course will teach students how to drive a project by value instead of a plan and how to involve stakeholders in an Agile environment.

Students will learn how to enhance project team performance and how to adapt to a project based on criticality of project deliverables.

The students will be introduced to principles and values of Agile Manifesto and how they are applied on Agile projects.

The course is designed to equip students with the practical knowledge and skills of Agile ways for working, a sought-after critical skill by modern organisations across the globe.
