

Audit Analytics : Insights to Transformation

Free
Session

May 18, 2022

10:00 am – 11:00 am (GST)

Key Topics :

- Enhance the level of assurance provided by Internal Audit
- Identify patterns that indicate control failures or potentially fraudulent activities
- Identify issues that the reporting techniques in your main IT system are unlikely to highlight
- Introduce a continuous rather than historical audit approach
- Learn how to use little known analytical techniques such as Benford's Law
